

PEGGY WANG

Berkeley, CA, United States | (669) 282-2311 | BLIPSANDCLICKS@GMAIL.COM | [GITHUB](#) | [LINKEDIN](#)

Frontend Software Engineer transitioning from data-driven roles in management consulting into full-time software development. Building on freelance web development experience and an initial frontend bootcamp, I've most recently completed Flatiron School's intensive Software Engineering program to deepen my technical foundation. Bringing analytical expertise, ease in cross-functional collaborations, and a growing proficiency in web development and UX design. Adept at building meaningful personal and professional relationships, committed to continuous learning, and thriving in innovative environments.

SKILLS

ENGINEERING

JavaScript ES6, React, Redux, Next.js, HTML, CSS/SASS, Python, Flask, Node.js, Express, SQL, SQLite, SQLAlchemy, MongoDB, i18n, Jest, Cypress, Git, RESTful APIs, Docker, Jenkins, Travis, Github Co-pilot, OpenAI api, Jira, Agile Methodologies

DESIGN

UX Design, Figma, Sketch, Adobe Suite, Affinity Suite

EXPERIENCE

Freelance, Berkeley, CA, United States – Full Stack Developer

JUNE 2024 - PRESENT

Leading end-to-end web development projects with focus on responsive design and modern frameworks.

- Implementing pixel-perfect functional components for a single-page application, translating wireframes into production-ready code.
- Managing platform migration project, transitioning from Squarespace to headless CMS architecture to improve site performance and content management.

TECH: React, Next.js, SCSS, i18n, Pair Programming

Blocket AB, Stockholm, Sweden – Frontend Developer (Contract)

SEPTEMBER 2022 - MARCH 2023

A digital marketplace, akin to Craigslist, with 5 million weekly visits, 8 out of 10 Swedes have used it, and 99% have heard of it.

- Led component standardization initiative by converting hard-coded values to a centralized endpoint, improving maintainability and enabling rapid brand updates across the platform.
- Developed and maintained reusable React components for search result pages and ad layouts, implementing pixel-perfect UI with efficient CSS pre-processors.
- Successfully integrated with complex deployment pipeline, pushing code to production within first week using Travis, Spinnaker, and Datadog.
- Collaborated closely with product managers and designers to implement features that enhanced user experience and met business objectives.
- Adapted to a large, complex codebase, making impactful changes without disrupting existing functionality.
- Resolved tasks to refine search experience, regularly completing tickets in Jira with thorough documentation.

TECH: React, Next.js, Node.js, Cypress, Travis, Spinnaker, Datadog, Okta, Scrumban, Jira, Figma

Reason Studios AB, Stockholm, Sweden – Frontend Web Developer (Contract)

SEPTEMBER 2021 - MARCH 2022

Creators of Reason, a digital audio workstation used by artists including Beastie Boys and Hans Zimmer. Sole developer supporting Marketing Team campaigns reaching 1M+ email subscribers.

- Successfully migrated content management system from Django to WordPress, reducing development team dependencies and accelerating marketing team content deployment by 50%.
- Implemented responsive landing pages and signup flows for major product launches, including Sound Minds podcast series.
- Expanded technical capabilities by learning Python to develop Discord bots for marketing promotions, demonstrating ability to quickly master new technologies.

TECH: React, Django, Python, Docker, SASS, Jenkins, Figma, Sketch

Great Place to Work, San Francisco, CA, United States – Various Roles

MAY 2012 - AUGUST 2018

Independent producer of Fortune 100 Best Places to Work List. Progressed through multiple roles with increasing responsibility in data analysis and UX improvement.

- Led UX improvements for employee engagement survey platform, partnering with developers to implement responsive design and accessibility features.
- Served as primary UX designer and subject matter expert for new data applications, ensuring intuitive user experience for complex analytical tools.
- Department lead in implementation of automated data cleaning solution, defining technical requirements and managing user testing process.
- Facilitated client adoption of the new application by running trainings, which boosted data accuracy.
- Led Knowledge Management review, resulting in a unified document platform that improved access and collaboration across teams.
- Global Survey Deployment: Managed surveys for 80+ clients, meeting all reporting deadlines.
- Created detailed documentation and trained new team members, establishing clear procedures and aiding knowledge transfer.

PROJECTS

Pocket Zodiac – [Github](#) | [Demo](#) – Solo Full Stack Application

- Independently built app using React frontend and Python/Flask backend with SQLAlchemy ORM
- Implemented secure authentication flow using Google OAuth and JWT tokens
- Designed and implemented RESTful API endpoints and custom database schema

TECH: React, React-Router, Python, Flask, SQLAlchemy, SCSS, Formik, Yup, bcrypt, marshmallow, Google OAuth, JWT

Wax Staxx – [Github](#) | [Demo](#) – Collaborative Single Page Application

- Led frontend development in three-person team creating a React app for music collectors
- Implemented secure user authentication using React Context API and custom hooks
- Designed responsive UI components and form validation system using SCSS and Formik

TECH: React, Vite, Formik, Yup, UUID v4

EDUCATION

Flatiron School, Virtual/NYC – Software Engineering

GRADUATED MAY 2024

Ford & Lovelace Fellow (selected for academic excellence and commitment to diversity in tech)
15-week intensive program focused on PRF stack (Python, React, Flask, SQL)

Technigo, Virtual/Stockholm – Frontend Web Development

GRADUATED FEBRUARY 2021

24-week program focused on MERN stack (MongoDB, Express, React, Node.js)

General Assembly, San Francisco – User Experience Design

GRADUATED December 2015

12-week program

San Francisco State University, San Francisco – BA Industrial Arts: Graphic & Product Design

GRADUATED JANUARY 2009

Brunel University London, Uxbridge, UK – Product Design Exchange Year

SEPTEMBER 2006 - MAY 2007
